-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-39 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-39 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on ____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 2.
- 4) ☐ Interview Summary (PTO-413) Paper No(s) ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other:

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 19-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 19, line 2, "said first terminating surface" lacks antecedent basis.

Claim 22, line 2, "said second terminating surface" lacks antecedent basis.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 2, 4, 5, 7-11, 15-19, 21, 22, 24-28, and 32-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent No. 5-86767 (JP '767) in view of Suska (3,921,225).

JP '767 discloses a gravity hinge (and gravity gate) comprising an upper cylindrical knuckle 9 having a first surface and an opposing second, oblique surface 13, a lower cylindrical knuckle 8 having a first, oblique surface 12b and a second surface, and a spindle 10. The knuckles are tubular and receive the spindle. JP '767 does not disclose a bushing that separates the upper and lower knuckles. Suska teaches a bushing between knuckle surfaces. Suska

Art Unit: 3676

teaches that the bushing extends the life of the hinge, lowers friction, lessens noise, and is maintenance free because the bushing is self-lubricating. The bushing can be made of a polymer or can have a coating (can be a laminate, see col. 5, lines 23-27). The bushing has a lower coefficient of friction than the knuckle surfaces. The bushing has a cylindrical sleeve that surrounds the spindle. Therefore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to modify the hinge of JP '767 with the bushing of Suska to extend the life of the hinge, reduce noise and friction, improve wear, and eliminate maintenance.

5. Claims 1-3, 5, 6, 8-11, 15-20, 22, 23, 25-28, and 33-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rhodes (4,697,306) in view of Suska.

Rhodes discloses a gravity hinge (and gravity gate) comprising an upper cylindrical knuckle 22 (or 27a) having a first surface and an opposing second, oblique surface 29 (28), a lower cylindrical knuckle having a first, oblique surface 13, 24 and a second surface, and a spindle 11, 23. The spindle extends from the first surface of the lower knuckle into a recess in the upper knuckle. The spindle is integral with the lower knuckle. Rhodes does not disclose a bushing that separates the upper and lower knuckles. Suska teaches a bushing between knuckle surfaces. Suska teaches that the bushing extends the life of the hinge, lowers friction, lessens noise, and is maintenance free because the bushing is self-lubricating. The bushing can be made of a polymer or can have a coating (can be a laminate, see col. 5, lines 23-27). The bushing has a lower coefficient of friction than the knuckle surfaces. The bushing has a cylindrical sleeve that surrounds the spindle. Therefore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to modify the hinge of Rhodes with the bushing of Suska to extend the life of the hinge, reduce noise and friction, improve wear, and eliminate maintenance.

Art Unit: 3676

Regarding claims 5, 6, 22, and 23, making the spindle integral with the upper knuckle and extending into a recess in the lower knuckle is considered a design choice. See *In re Gazda*, 104 UPSQ 400 (CCPA 1955). Therefore it would have been obvious for one of ordinary skill in the art at the time the invention was made to reverse the parts such that the spindle is integral with the upper knuckle and extends into the lower knuckle as a matter of choice in design.

6. Claims 12-14 and 29-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rhodes in view of Suska as applied to claims 1 and 17 above, and further in view of Gidseg (4,864,691).

Rhodes does not specify the material of the knuckles. Gidseg teaches art equivalent materials for hinge knuckles (see col. 11, lines 32-42). Gidseg teaches metal, polymers, and ceramics as art equivalent materials for hinges. Therefore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to make the hinge knuckles of Rhodes out of metal, ceramic, or polymers as such are taught to be art equivalent materials by Gidseg.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alison K. Pickard whose telephone number is 703-305-0882. The examiner can normally be reached on M-F (9-6:30), with alternate Friday's off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Knight can be reached on 703-308-3179. The fax phone numbers for the

Application/Control Number: 09/780,306
